

Video Outline: CSS Text Formatting

Total Estimated Duration: 4 to 5 minutes

Topic: Cascading Style Sheets (CSS) – Text Formatting

1. Introduction (0:00 – 0:45)

Visual: Host on camera or animated title card with sleek code graphics: "Mastering CSS Text Formatting".

Key Points:

Welcome viewers to the tutorial.

Brief explanation of why text formatting matters: clear typography improves readability, user experience, and visual branding.

Quick overview of what will be covered: font families, font weights, font sizes, line heights, and text alignment.

2. Concept Explanation (0:45 – 1:45)

Visual: Slide-based presentation or screen graphic showing CSS properties alongside visual text transformations.

Core Concepts:

font-family: Defines the typeface (e.g., serif, sans-serif, custom Google Fonts) and fallbacks.

font-size: Controls text size using units like px, rem, em, or %.

font-weight: Sets thickness (e.g., normal, bold, or numeric values 100–900).

line-height: Adjusts spacing between lines of text for better legibility.

text-align: Positions text horizontally (left, right, center, justify).

3. Live Code Walkthrough (1:45 – 4:15)

Visual: Screen recording of your IDE (e.g., VS Code) alongside a live web browser preview.

Steps:

HTML Setup: Show a simple `<article>` containing a heading (`<h1>`) and two paragraphs (`<p>`).

Font Family & Google Fonts:

Import a Google Font (e.g., Inter or Roboto).

Apply font-family: 'Inter', sans-serif; to the body.

Font Sizes & Weights:

Style h1 with font-size: 2.5rem; and font-weight: 700;.

Style paragraph text with font-size: 1rem; and font-weight: 400;.

Line Height:

Show how dense paragraph text looks by default, then add line-height: 1.6; to improve readability.

Text Alignment:

Set text-align: center; on the heading and demonstrate text-align: left; vs justify; on body text.

4. Summary & Conclusion (4:15 – 5:00)

Visual: Host back on camera or summary screen showing the before/after side-by-side comparison of the unstyled vs styled HTML page.

Key Takeaways:

Recapped properties: font-family, font-size, font-weight, line-height, text-align.
